Loon *— Yellow overall, red nacille cap, black nacille, black and white rudder and elevators.*

Loon *— Yellow or orange overall, red nose.*

PMAVI-003

This decal sheet was produced for the accurate 1/48 "Buzz Bomb V-1" kit by Pacific Monograph. Otherwise a very good kit, the 1/48 Tamiya kit of the V-1 is 2mm too tall in the forward engine pylon and the fin/rudder; they need to be reduced. The antique Hawk kit may also need modifications. American versions of the V-1, called the JB-2 by the Army Air Forces and the Loon by the Navy, often had modified forward engine pylons and nose probes. As always, check your sources!
